Kleine Schriften: Festgabe für Helmut Rix zum 75. Geburtstag. Edited by Gerhard Meiser. Bremen: Hempen Verlag, 2001. xxv + 402 pp.

The most serious criticism one can level against this beautifully produced collection of twenty-one papers by Helmut Rix is that it is not nearly long enough! Virtually every one of the pieces in this volume is in some sense a "classic"; and yet, this towering figure of Italic and Indo-European linguistics has produced many other important works that one might have wished to see in a truly compendious *Kleine Schriften*. In terms of chronology, this collection ends with two papers published in 1992; but Rix's post-1992 work up to the publication of this birthday tribute (as can readily be seen in the extremely useful "Schriftenverzeichnis von Helmut Rix," pp. xi–xxv) includes nearly sixty items, some of them classics already and others destined to acquire that status before very long. Perhaps we will eventually be favored by a follow-up volume that helps provide more generous coverage of the Rixian *oeuvre*.

The papers are photographically reproduced from their original publication venues, and helpfully include both the original pagination and the running pagination of this volume. They are divided into three more or less equal sections: "Indogermanistik" (six papers), "Italistik" (eight papers), and "Etruskologie" (seven papers). The editor has also provided a full word index, which immeasurably enhances the usefulness of the volume. (The only typographical error I noted in the editorial material appears in the table of contents, where the 1991 paper on PIE **ĝʰeslo-* '1,000', item 132 in the "Schriftenverzeichnis," is listed as item 130.)

This hardcover book is handsomely designed, clearly printed, superbly bound, and—*mirabile dictum*—not unreasonably priced (65.40 Euros, approximately $57). It hardly needs to be added, in conclusion, that no serious Italic or Indo-European collection should be without it.

Electronic Resources for IE: An Update

New E-mail Lists on Yahoo

• Sogdian-L: A new e-mail discussion list, Sogdian-L, devoted to Sogdian history, relations with other communities and civilizations of Eurasia, language, numismatics, archaeology, art history, religion, and comparative cultural studies has been established. Its address is: http://groups.yahoo.com/group/Sogdian-L/. This is an open, unmoderated forum. Information on how to subscribe and post messages is available at the address above.

• Proto-Indo-European (PIEML): A list devoted to the scholarly discussion of PIE linguistics, religion, archaeology, and other topics has now been set up on Yahoo. The web address for this list is: http://groups.yahoo.com/group/pieml/.

***l'Année philologique*/Database of Classical Bibliography Online**

Until April 28, 2002, the joint website of *l'Année philologique* and the Database of Classical Bibliography (http://www.annee-philologique.com) will be freely accessible. The website makes available the contents of thirty-one volumes of *APh* (vol. 40 [1969]–70 [1999]). Volume 71 (2000) is planned to be added shortly, with database updates at regular intervals to include older and newer volume materials. A variety of indexes are available to facilitate searches. After April 28, access to the database will be restricted to paid subscribers. Costs will range from 45 Euros (for individuals) to 200–765 Euros (for institutions, depending upon the number of simultaneous connections). In this project, the Greek is transliterated, however the French site is investigating the possibility of displaying Greek in its original script.

***Encyclopædia Iranica* Online**

Articles from volumes one through ten (fascicle six) of *Encyclopædia Iranica* can now be downloaded and viewed at no cost from http://www.iranica.com, by clicking on "Entries" on the left-hand side of the website. Articles from volumes one through six (*-DARA*) are viewable with pdf, Adobe's free downloadable program. Entries from later volumes can be viewed directly from the computer screen (with HTML, not pdf), though users should download the
